20. ABSTRACT (Continue on reverse side if necessary and identify by block number) This paper develops a consolidated list of leadership tasks performed by both officers and noncommissioned officers. This list was then reviewed by Army subject matter experts to identify common activities which could be grouped into behavioral dimensions. These dimensions were then used to assess the consolidated list and to develop some additional task statements. The final combined list of officer and noncommissioned officer tasks was then evaluated.

INTRODUCTION

Goals

The design of effective leadership identification and development programs must be based on an examination of behavioral demands placed on leaders. While a variety of strategies is available for obtaining this kind of descriptive information, a task analytic approach was employed in the present research. The use of this particular data collection strategy was based in part on its concordance with ongoing Army research efforts and that it has been found to provide one of the most effective frameworks available for the design of selection and training programs (Fleishman & Quaintance, 1984).

In the earlier phases of the present study, it was found that the leadership activities performed by commissioned officers (officers) and noncommissioned officers (NCOs) were qualitatively different. For example, officers hold command positions, whereas NCOs support officers in command positions--both, however, are in leadership positions. Therefore, it was decided that separate leadership task lists should be formulated. These lists were prepared by obtaining comprehensive task descriptions of activities performed by incumbents in various positions, and examining these lists to identify those leadership activities performed in each position. Leadership activities were defined as reflecting discretionary activities influencing others (Mumford et al., 1985). The task lists were edited, reviewed, and refined to provide a basis for the specification of leadership job requirements and competency dimensions for officers and NCOs.

While identifying the leadership competency dimensions and job requirements associated with the various positions, two important results emerged. First, it was found that a newly identified set of knowledges, skills, abilities, and other personal characteristics (KSAOs) were likely to be relevant to both officer and NCO leadership performance (Mumford, Yarkin-Levin, Korotkin, Wallis, & Marshall-Mies, 1985). Second, it was found that the job performance dimensions (JPDs) summarizing the officer leadership tasks were very similar to those summarizing the NCO leadership tasks (Korotkin, Mumford, Yarkin-Levin,

Wallis, & Fleishman, 1985). These observations led to the construction of a general descriptive system applicable to both officers and NCOs.

Examination of the existing officer and NCOs task lists suggested that this might be feasible. First, it appeared that development of a general task list would require that the level of the task statements included in the initial officer and NCO lists be broadened. Second, if leadership activities are described in broad task statements, it was felt that procedures must be designed so that tasks could be assigned to multiple JPDs. Third, it was felt that a general conceptual framework should be developed to guide these revisions.

The general framework might be formulated in a number of ways. However, the earlier work of Korotkin et al. (1985) had indicated that it was possible to formulate a valid set of general JPDs based on theoretical considerations. It appeared that a general taxonomy for the definition and summary of leadership behavior might provide an adequate basis for the development of a general task list. The following sections will discuss the considerations influencing the nature of these revisions as well as the methodology employed and the results obtained in carrying out the revisions.

Background

Once a single set of thirteen theoretical JPDs was developed for both officers and NCOs, it appeared logical to develop a single leadership task list for both categories. Since the development of the new set of theoretical JPDs is discussed in Korotkin et al. (1985), that portion of the research will not be discussed in great detail.

Much of the research to date concerned remediation of inadequacies in existing task lists from various sources. While job task analyses had been conducted for company, battalion and brigade level officer positions, there was some uncertainty as to the adequacy of data pertaining to division and Department of the Army level staff positions. At the time of the present contract procurement, the data for NCOs was thought to be adequate since job analysis surveys in both CONUS and USAREUR were to be completed in time to provide a data base for this project. Provision was made to supplement the data for both officers and NCOs, should the existing task lists prove inadequate. It was stipulated in the Statement of Work that the contractor would perform whatever job analysis was required for positions in which existing data were inadequate. It was further stipulated that since the results of this effort and that of earlier efforts must be compared, the methodology should be similar in scope and objectives to that used in the completed U.S. Army Sergeants Major Academy first sergeant job analysis project and the USAREUR effort then in progress.

As discussed in Wallis, Korotkin, Yarkin-Levin, and Schemmer (1985), the officers' remediated task list was developed from the Army Research Institute (ARI) duty modules (Korotkin, Hadley, Davis, & Marsh, 1976), the Review of Education and Training for Officer (1978) duty modules, and the Soldier Support Center-National Capital Region's officer task data bank (CODAP, 1981, 1982). Leadership task lists extracted from these sources and subjected to field verification by panels of incumbents in grades O1 through O6 at Ft. Lewis, Washington, and Ft. Polk, Louisiana, received high ratings for completeness and accuracy. However, the variations in the specificity of the tasks on the remediated list continued to present problems. Some of this was due to the variations in the types of duties performed by lieutenants, for example,

who are primarily doers, and those performed by colonels, who do more supervising of the doers than doing themselves. This variation in specificity, when coupled with increased emphasis by the COTR on the development of a complete list of leadership tasks for officers, resulted in a reexamination of the remediated task list for officers.

Initially, leadership tasks gleaned from the Soldier Support Center-National Capital Region's CODAP lists had been examined by incumbents at Ft. Riley, Kansas, Ft. Devens, Massachusetts, and Ft. Lewis, Washington, to be used as a foundation for preparation of a comprehensive list of leadership tasks for E5s through E8s. Examination of the leadership task lists for first sergeants, platoon sergeants, section chiefs and squad leaders developed by the U.S. Army Sergeants Major Academy (USASMA) (Batia & Kaplan, 1981) showed these lists to be at a far more advanced state of development than starting over again with the CODAP lists. A decision had been made to use the USAREUR lists as a beginning and to augment them with any leadership tasks on the CODAP lists that were applicable and seemed to fill a gap. The product of this undertaking was examined by incumbents at Ft. Polk, who generally confirmed that the remediated list adequately covered the non-technical leadership tasks that they perform. This remediated task list contributed to the development of JPDs for NCOs. The remediation of existing leadership task data banks and the development of JPDs summarizing functionally related tasks were taking place in parallel.

The remediated task data bank had been regarded primarily as a stepping stone in the development of a set of job performance dimensions. However, when a second panel of experts had difficulty in assigning leadership tasks to the same JPDs to which the first panel had assigned them, the task list was recognized as containing tasks that could be perceived to fit well into more than one JPD. Analysis of the data collected from the second panel of experts, at Ft. Monroe, Virginia, for officers and at Ft. Bliss, Texas, for NCOs, caused a reassessment of where the project stood at that time and where it should go in the future in order to achieve the desired results.

If the leadership task lists were to serve a purpose other than the development of a set of JPDs for officers and NCOs, then the task lists

had to be remediated further for specificity and comprehensiveness. Also, if the JPDs were to be combined from two separate sets into a single set for both officers and NCOs, it followed that the separate task lists should also be combined into a single task list for grades E5 through O6.

DEVELOPMENT OF THE GENERAL TASK LISTS

A research scientist with a strong military background integrated the NCO list of 217 tasks into the list of 163 tasks for officers. By eliminating redundancies, broadening the scope of some narrowly defined tasks and dropping some tasks which were subsumed in others, the 380 tasks in the two lists were reduced to a single list containing 175 leadership tasks for grades E5 through O6.

The next step was to cluster these tasks under the appropriate newly designed JPD to determine whether the tasks supported the new set of theoretical JPDs for both officers and NCOs as well or better than they did the original set of separate JPDs. It was relatively easy for a staff member, not among those who had developed the new JPDs or combined the task lists, to assign all except 21 of the 175 tasks to one or more JPDs. Closer examination of these 21 tasks indicated that they were of an esoteric nature and should be dropped from the general non-technical list of leadership tasks. Some examples of the types of tasks that were difficult to place are: "Conduct unit physical security training;" "Establish observation posts;" and "Operate in an electronic warfare environment."

When all tasks had been assigned to a JPD, the next step in remediation of this task list was to identify any tasks not listed but required in order to perform the JPD. In some cases a task missing from one JPD had been assigned to a different JPD to which it also contributed. In such a case no new task was added, since it is recognized that many tasks make a contribution to more than one JPD. In seeking to make the task data bank as comprehensive as possible, it was only necessary to add a new task if it was absent from all JPDs. Thirty new tasks were added by a psychologist/military expert team.

Once these tasks had been tentatively assigned to JPDs, the tasks incorporated in the E9 task list (Connor, 1975) were viewed by an Army subject matter expert at the request of the sponsor to ensure coverage of sergeant major leadership activities. The definition of leadership behavior employed throughout this effort was used to identify all those tasks incorporated in this list that could be considered leadership

tasks. Of the 477 original tasks, 462 were designated as legitimate leadership tasks. Subsequently, an attempt was made to determine whether each leadership task was in some way covered by the existing JPDs and the leadership tasks assigned to them. To accomplish this, our Army subject matter experts first determined whether the task could be assigned to one or more of the JPDs and, if it could be so assigned, whether a similar task statement had already been assigned to the JPDs. Of the 462 leadership tasks appearing in the sergeant major list, it was found that all but 11 could be assigned to one or more of the JPDs and were adequately described by one or more of the tasks already assigned to the JPD.

The final step in remediating the combined task list was done by a panel of two psychologists not intimately familiar with either the task list or the revised and newly defined set of theoretical JPDs. Their job was to answer the following questions about each task statement:

- Is the task statement clear?
- Is the general level of specificity of the tasks uniform?
- Is the task clustered into the most appropriate JPD?
- Are there tasks obviously missing from the JPDs?

As a result of this examination, five task statements were reworded and three were deleted, leaving a total of 202 tasks on the integrated list. (See Appendix C).

It should be pointed out that all of the tasks on this list, except for the 33 added by staff members, were extracted from the separate verified task lists for officers and NCOs. While the field list of the revised and combined list planned for panels of officers and NCOs at Ft. Leavenworth, Kansas, in December 1984 would have provided a forum for reverifying most of the tasks and for verifying those that were added or substantially changed, the cancellation of this step does not detract from the overall validity of the task data bank.

CONCLUSIONS

A single leadership/management task list for officers and NCOs is a logical step in developing a taxonomy of tasks performed by all grades from E5 through O6. The two separate task lists developed earlier in the research project provided ample material for generating the combined list when used in conjunction with the theoretically developed JPDs and their definitions.

Examination of additional task lists such as those for command sergeant majors maintained by the Soldier Support Center-National Capital Region and the Lieutenant Leadership Task (Competency) List developed by the Center for Army Leadership reveals that additional tasks for additional grades and from new sources can be integrated into the revised JPDs with supporting tasks, and thus into the leadership task data bank, without difficulty.

17. c. Issue guidance, train in proper procedures, and evaluate results.
18. c. Motivate subordinates and evaluate their job performance.
19. c. Review studies, plans, orders, reports and correspondence prepared by assistants and approve, disapprove or refer to supervisor with recommendation.
20. c. Organize personnel and other resources into functional elements to accomplish mission.
21. c. Establish time requirements for developing a master schedule.
22. c. Establish priorities and production controls to distribute workload and optimize use of facilities.
23. c. Plan assignment of work to organizational elements.
24. c. Plan and allocate ADP equipment utilization time for supported units and activities.
25. c. Interpret output of a management information system.
26. c. Operate a system for filing, retrieval, display, and reporting of information.
27. c. Employ OR/SA methodologies such as simulation models, statistical analyses, network portrayals, gaming and the like for identifying solutions to complex problems.
28. a. Develop and implement management analysis methods.
29. c. Develop and implement standards of performance and conduct.
30. c. Develop and implement procedures for work measurement and simplification.
31. c. Make managerial studies for improved efficiency of operation.
32. c. Develop budgets and cost estimates for overall projects and included work packages.
33. c. Prepare directives for development and preparation of command operating program and budget, and concomitant budget execution review.
34. c. Modify and up-date plans, schedules, and budgets on basis of program evaluation and review.

35. c. Develop plans, sequence key events and activities, coordinate interdependent networks and identify critical paths.
36. c. Develop personnel plans, programs and directives concerning training, organization and manpower.
37. c. Develop plans, programs and directives concerning maintenance systems.
38. c. Evaluate budgetary constraints and other matters of risk and sensitivity for the decision-maker.
39. c. Conduct and review studies and surveys of organizations, manpower, space and equipment to assist in management improvements.
40. c. Design and control formats for receiving reports and statistical summaries of operations.
41. c. Prescribe and review standing operating procedures for internal functioning.
42. c. Prepare studies, plans or correspondence for a superior.
43. c. Arrange for headquarters facilities and support services.
44. c. Establish and operate a suspense system.
45. c. Place demands upon a system for filing, retrieval, display and reporting of information.
46. c. Screen incoming correspondence and distribute for action or information.
47. c. Report and investigate safety violations, accidents and irregularities, and take corrective action.
48. a. Process and accommodate visitors to headquarters.
49. b. Administer unit funds.
50. c. Authenticate orders and official correspondence.
51. c. Conduct personnel administrative programs such as decorations and awards, billeting, promotions and separations.
52. b. Perform maintenance record administration in unit.
53. c. Initiate concept documents in concert with the TRADOC community.

- 54. c. Conduct concept organizational equipment and material evaluations.
- 55. c. Recommend development, acquisition, rejection or revision of concepts and associated equipment.
- 56. c. Attend meetings and conferences related to test concept and evaluation and observe demonstrations and tests.
- 57. c. Counsel and assist subordinates on personal affairs, job performance, professional development and disciplinary matters.
- 58. c. Coordinate personnel selection and career development.
- 59. c. Guide personnel management operations of subordinate personnel section or special staff.
- 60. c. Recommend/assign personnel to key positions.
- 61. c. Establish procedures for safeguarding classified information.
- 62. c. Arrange for health, legal and religious services.
- 63. c. Encourage personnel to take full advantage of recreational facilities, Post Exchange, mess and club services.
- 64. c. Conduct a reenlistment program.
- 65. c. Conduct race relations and equal opportunity programs.
- 66. c. Conduct an alcohol and drug abuse program.
- 67. b. Operate corrective treatment and rehabilitation program, with aid of professional specialists, including counseling, training and vocational work tailored to individual needs.
- 68. c. Develop and conduct crime prevention or reduction program.
- 69. c. Review MP blotters, obtain pertinent information from other reports and sources and take appropriate action.
- 70. c. Determine and coordinate intelligence requirements for combat patrols, long-range patrols, ground surveillance, radar activity and other forms of ground reconnaissance and surveillance.
- 71. c. Determine intelligence and security requirements of rear area.

- 72. c. Establish procedures for local security, camouflage, cover, concealment, dispersion and NBC protection.
- 73. c. Keep abreast of NBC activities in actual or simulated combat operations and post and display NBC tactical information.
- 74. c. Interpret and apply specialized tables and instruments pertaining to delivery systems and effects of nuclear weapons.
- 75. c. Inspect and evaluate facilities and activities for counter-intelligence security.
- 76. b. Assess friendly and enemy activities in area of operations for the application of PSYOP capabilities.
- 77. c. Plan/employ surveillance radar, sensing devices, and other measures to establish local security.
- 78. c. Develop logistic requirements for supported and/or subordinate units and activities.
- 79. c. Provide logistic support for supported units and activities.
- 80. c. Establish and organize special ammunition supply points, including safety and security arrangements.
- 81. c. Conduct chemical combat service support operations.
- 82. c. Carry out nuclear weapons emergency procedures to recover nuclear items and minimize hazards in event of an accident.
- 83. c. Issue guidance for the requisitioning, movement, storage, security and issuing of supplies.
- 84. a. Plan, coordinate, establish and operate supply, storage and distribution facilities.
- 85. c. Control distribution of scarce and controlled items.
- 86. c. Operate food service facility.
- 87. c. Plan and coordinate assignment and employment of subordinate maintenance unit and sites and facilities for them.
- 88. b. Establish and operate an office, motor pool or comparable field facility for dispatch of vehicles and displaying the status of vehicles.
- 89. c. Allocate and coordinate transportation.

90. c. Make plans and preparations for movement of unit by rail or ship and for its on-shore deployment and field set-up.
91. c. Inspect condition and verify quantities of organizational equipment, weapons, and supplies.
92. c. Establish and spot-check inventory and stock control procedures.
93. c. Establish safeguards against pilferage and other hazards.
94. c. Assume responsibility for the care, security, and maintenance of facilities, grounds, and installation property in unit custody.
95. c. Assign maintenance priorities.
96. c. Conduct or arrange for maintenance inspections.
97. c. Establish and operate special security measures for the security of and access to ADM and associated classified material.
98. c. Plan/arrange for, and carry out construction, alteration, maintenance, and repair of installation's physical plant and facilities.
99. c. Plan and prepare units of instruction, POI, lesson plans, training aids and make arrangements for physical facilities.
100. c. Coordinate instructional substance, coverage and phasing with others concerned.
101. c. Arrange for military personnel educational opportunities.
102. c. Formulate training goals, policies and programs.
103. c. Conduct specialized training (ceremonies, counter-intelligence, EW, NBC, etc.).
104. c. Request training areas, ranges and other training facilities.
105. c. Request school allocations to meet needs of unit.
106. c. Plan and participate in ROTC summer camp training activities.
107. c. Assist designated reserve component units with the preparation and conduct of training.

- 108. c. Accompany Army reserve component unit commander and staff on inspections and assist in handling remedial actions for surfaced problems.
- 109. c. Conduct physical training.
- 110. c. Manage range firing.
- 111. c. Conduct inspections to evaluate unit's performance of mission, compliance with policies and regulations, state of morale, discipline and readiness, and condition of equipment and facilities.
- 112. c. Determine operational readiness requirements and evaluate readiness status of unit.
- 113. c. Ensure unit proficiency in basic soldier skills (hand-to-hand combat, map reading, first aid, weaponry, drill and ceremonies).
- 114. c. Plan and coordinate training exercises.
- 115. c. Evaluate relevant factors including mission, enemy, terrain, and troops; reconnoiter physically or by use of maps and photos and make an estimate of the situation.
- 116. c. Coordinate operations planning within staff and with higher, lower and supporting organizations.
- 117. c. Plan/recommend disposition and employment of unit.
- 118. c. Issue operations order to carry out unit's mission.
- 119. c. Evaluate plans of subordinate units and take action to correct deficiencies.
- 120. c. Evaluate operation's progress and modify orders as the situation warrants.
- 121. c. Check personnel, weapons, equipment and supplies and prepare for further operations.
- 122. c. Coordinate/ensure overall security of command.
- 123. c. Coordinate employment of vehicles, communications, and other equipment for command group during field exercises.
- 124. c. Arrange and control liaison with other headquarters.
- 125. c. Coordinate signal intelligence and sensor activities.
- 126. c. Coordinate logistical matters within staff and with higher, lower, and supporting organizations.

- 127. c. Coordinate explosive ordnance disposal (EOD) plans and operations with others concerned.
- 128. c. Plan and coordinate actions concerning refugee handling and control of civilian population in theater of operations.
- 129. c. Coordinate/control subordinate combat service support unit operations.
- 130. c. Coordinate actions with friendly units and civil authorities.
- 131. c. Coordinate air defense support and observation plans with supported unit and other fire support units.
- 132. c. Coordinate air-ground recognition, identification, and forward air-control procedures.
- 133. c. Control tactical elements in motor movements and in occupation, organization, preparation and improvement of positions.
- 134. c. Issue guidance for establishment and operation of headquarters command post and Tactical Operations Center (TOC).
- 135. c. Establish and operate tactical operations center (TOC) to include a fire support coordination center.
- 136. c. Reconnoiter and select observation positions, areas or routes of responsibility and fire positions.
- 137. c. Determine capabilities and requirements for overall fire support.
- 138. c. Develop and coordinate support plans such as fire support, intelligence collection, nuclear employment, etc.
- 139. c. Control employment of unit's organic fire support weapons.
- 140. c. Plan for/employ nuclear rounds when authorized.
- 141. c. Plan tactical engineer work such as pioneering, field fortifications, demolitions and mine laying.
- 142. c. Perform tactical engineering work such as pioneering, field fortifications, demolitions and mine laying.
- 143. c. Determine communications requirements and capabilities and plan for their employment.

- 144. c. Train subordinate commanders how to develop/improve morale and esprit in their units.
- 145. a. Supervise nuclear surety (PRP).
- 146. a. Plan/monitor professional association activities (AUSA, Division Assoc., etc).
- 147. c. Ensure that multi-echelon training contributes toward demonstrated competence and confidence of soldiers in themselves, one another, their leaders and their units.
- 148. c. Conduct periodic assessments of status of training/professional development of officers/non-commissioned officers and design a training program to sustain strengths/overcome identified deficiencies.
- 149. c. Prepare dependents of Army personnel for prolonged absences of sponsors to ensure that basic family survival needs are established beforehand.
- 150. c. Develop a work climate that permits rapid development of junior officers and non-commissioned officers, and which encourages the best to opt for a career in the Army.
